| | equipment. Any accessories, peripherals, | |
|----------|--|---|
| | or support equipment connected to the | |
| | module during testing shall be | |
| | unmodified and commercially available | |
| | (see Section 15.31(i)). | |
| 6 | The modular transmitter must be | X |
| | equipped with either a permanently | |
| | affixed label or must be capable of | |
| | electronically displaying its FCC | |
| | identification number. | |
| | (A) If using a permanently affixed label, the | |
| | modular transmitter must be labeled with its own | |
| | FCC identification number, and, if the FCC | |
| | identification number is not visible when the | |
| | module is installed inside another device, then | |
| | the outside of the device into which the module is | |
| | installed must also display a label referring to | |
| | the enclosed module. This exterior label can use | |
| | wording such as the following: "Contains Transmitter Module | |
| | FCC ID: XYZMODEL1" or "Contains FCC ID: | |
| | XYZMODEL1." Any similar wording | |
| | that expresses the same meaning may be used. | |
| | The Grantee may either provide such a label, an | |
| | example of which must be included in the | |
| | application for equipment | |
| | authorization, or, must provide adequate | |
| | instructions along with the module which explain this requirement. In the latter case, a copy of | |
| | these instructions must be included in the | |
| | application for equipment authorization. | |
| | (B) If the modular transmitter uses an electronic | |
| | display of the FCC identification number, the | |
| | information must be readily accessible and | |
| | visible on the modular transmitter or on the | |
| | device in which it is installed. If the module is | |
| | installed inside another device, then the outside of the device into which the module is installed | |
| | must display a label referring to the enclosed | |
| | module. This exterior label can use wording such | |
| | as the following: | |
| | "Contains FCC certified transmitter module(s)." | |
| | Any similar wording that expresses the same | |
| | meaning may be used. The user manual must | |
| | include instructions on how to access the | |
| | electronic display. A copy of these instructions must be included in the application for | |
| | equipment authorization. | |
| 7 | The modular transmitter must comply | X |
| ' | with any specific rules or operating | |
| | requirements that | |
| | ordinarily apply to a complete | |
| | | |
| | transmitter and the manufacturer must | |
| | provide adequate instructions along with | |
| | the module to explain any such | |
| | requirements. A copy of these | |
| | instructions must be included in the | |
| | application for equipment authorization. | |

| 8 | The modular transmitter must comply | | X |
|---|--|--|---|
| | with any applicable RF exposure | | |
| | requirements in its final configuration. | | |

A limited modular approval may be granted for single or split modular transmitters that do not comply with all of the above requirements, *e.g.*, shielding, minimum signaling amplitude, buffered modulation/data inputs, or power supply regulation, if the manufacturer can demonstrate by alternative means in the application for equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the operating conditions in which the transmitter will be used. Limited modular approval also may be granted in those instances where compliance with RF exposure rules is demonstrated only for particular product configurations. The applicant for certification must state how control of the end product into which the module will be installed will be maintained such that full compliance of the end product is always ensured.
